Susan,

At this time, Site Assessment will not be conducting an SI at the CES Environmental Services site. Instead, we will end our activities at the PA stage. This comes at the request of TCEQ since the site will be entering their VCP. The PA report will be used by the PRP in their application for the VCP. As soon as I have received the completed and approved VCP application from TCEQ, I will complete the SSSR for EPA to designate the site as NFRAP.

Let me know if you have any other questions.

Thanks,

Bret Kendrick

Importance: High

It's my understanding per Gary today you have conducted a PA at the site? Are you planning to conduct an SI? If so, who have you talked to in the community and at TCEQ regarding potential sampling? Is TCEQ conducting potential SI?]

Background: I believe this may relate to a Sheila Jackson Lee statement to the RA we are following up on regarding sampling at the adjacent school. Thank you in advance...susan
